

KIWI BERRIES

NEW & EXCITING FRUIT!

Kiwi berries are one of the most exciting new fruits to come into the produce market in years. About the size of a grape, kiwi berries are a small variety of kiwi fruit that have a smooth, edible skin. The fuzz-free exterior makes it easy to pop this berry-like fruit into your mouth as a quick and delicious snack. The softer the berry the sweeter the taste. Kiwi berries are packed with flavor... but they have a short season, so get them while you can!

Available: February & March, September through November
